

TS #141703  
copy 1

13 January 1958

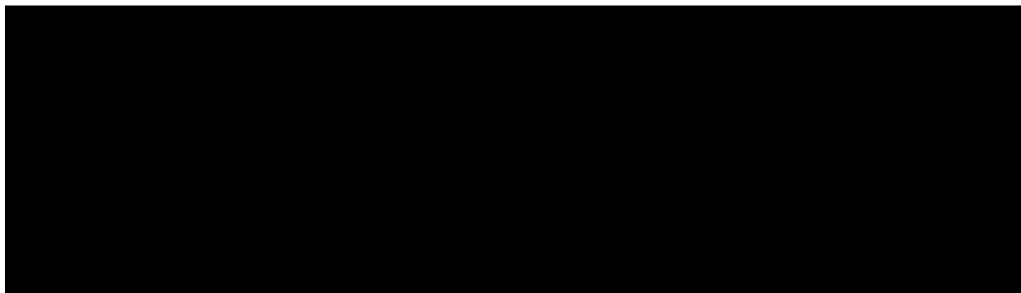

MEMORANDUM FOR: Deputy Director, Intelligence

SUBJECT: Reference to Earth Satellites in Materials Submitted to Congressional Committees.

REFERENCE: Memorandum for the DCI dated 6 January 1958, TS #141698.

1. Mr. Warner has reminded me that there was a reference to Soviet earth satellite programs in written material submitted by the DCI to the House Appropriations Subcommittee on 25 July 1957. These materials were supplied in answer to a series of questions raised by the Committee. Question #23 referred to the "meagerness" of information on Soviet aircraft, ship, and guided missile production, and asked whether we actually had any "good" operations within the USSR. The answer, classified TOP SECRET, briefly described CIA collection efforts and gave some examples of materials collected. It included the following sentence:

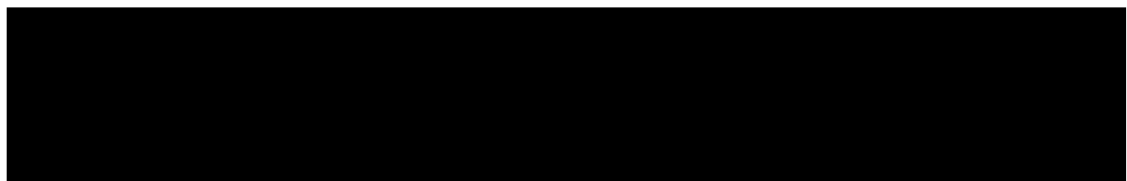

25X1D0a

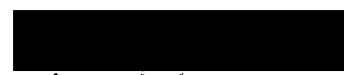

~~TOP SECRET~~

~~TOP SECRET~~

25X1D0a

2. Mr. Warner also informs me that, in response to the  
DEI's suggestion, he is taking steps to assemble in his  
office copies of all transcripts and other materials relating  
to Congressional briefings. I therefore plan to turn over to  
him those materials now in my possession.
